

Raptor Biomedicine III

including
Bibliography of Diseases of Birds of Prey

Edited by
J.T. Lumeij, J. David Remple, Patrick T. Redig, Michael Lierz, John E. Cooper

RAPTOR BIOMEDICINE III is the highly acclaimed and anticipated Proceedings of the Third International Raptor Biomedical Symposium, which was held in August, 1998 in South Africa. It continues the tradition of these conferences, held once every decade, of providing the most up-to-date knowledge in this specialized field.

This extraordinary reference successfully blends wildlife biology, the age-old art of falconry and the veterinary specialty of avian medicine and surgery. Anyone dealing with the care of captive raptors or the conservation of free-ranging birds of prey will find this book to be an essential resource.
